

TITLE

COMPOSITIONS COMPRISING NOVEL COMPOUNDS AND  
ELECTRONIC DEVICES MADE WITH SUCH COMPOSITIONS

5

ABSTRACT OF THE INVENTION

The present invention relates to novel compounds and  
compositions comprising novel oligomers and polymers, and electronic  
device comprising at least one layer containing the compositions. The  
novel oligomers and polymers can be solubilized, and can be used in  
10 solution to form electronic devices.

The compounds can function as monomers, and copolymers can  
be formed from such monomers, such copolymers comprising, as  
polymerized units, a plurality of units of the compounds.
